### **DETAILED ACTION**

Applicant's election with traverse of Group I, claims 1-8, 17-20 in the reply filed on 9/18/2008 is acknowledged. The traversal is on the ground(s) that the restriction is only proper if the restricted claims are patentably distinct and there is no burden of search on examiner. This is not found persuasive because as indicated in the previous communication the inventions are distinct because the two-process have a different mode of operation. Therefore, the method of make-up a catalyst is not obvious over the method of shut-down of a reactor. Each group has a various process step that requires additional search.

The requirement is still deemed proper and is therefore made FINAL.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-8 and 17-20 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-20 of copending Application No. 10/571,125. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims have the same scope as the claims of copending application No. 10/571,125. For instance steps d-k of claim 1 are recited in claim 10 of the copending application. Therefore, the instant claims anticipate the claims that are disclosed in the copending application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
